Board of Editors: **P. T. Bateman, C. M. Pearcy, J. T. Schwartz**
Executive Editor: **J. L. Selfridge**
Editors: **A. A. Armendáriz, D. Bollman, E. Gerlach, S. Ivanov, P. Jambor, L. Janos, J. S. Joel, V. Komkov, R. Melter, M. Rabindranathan, P. B. Smith**
Editorial Manager: **Angelika Kruliš-Randa Cardew**
Administrative Manager: **Raymond E. Goucher**
Administrative Secretary: **Jane Z. Ophoff**
Head Librarian: **Janice Seidler**
Chief Proofreader/Copyeditor: **Jennifer A. Mair**
Clerical Section Manager: **Rilla J. Thedford**
Records Office Supervisor: **Juan Rodríguez-Padró**
System Manager: **David L. Rodgers**
Director of Computer Operations: **Thomas P. Smedes**
Data Entry Supervisor: **Sandy Barth**
Editorial Consultants: **T. G. Bergstrom, F. J. Beutler, A. Blass, J. W. Brown, I. Cesari, S. K. Cho, D. J. Deckard, C. L. Dolph, J. L. Goldberg, F. Harary, A. E. Heins, P. G. Hinman, D. J. Lewis, N. H. McClamroch, M. S. Ramanujan, J. F. Riordan, R. A. Scott, C.-T. Shih, N. Starr**

Editorial Office: University of Michigan, Ann Arbor, Michigan. Editorial correspondence should be addressed to Mathematical Reviews, 611 Church Street, Ann Arbor, Michigan 48109, U.S.A.

Subscription information: Subscription prices for Volumes 55 and 56 (1978) of Mathematical Reviews and Volume 10 of the Index of Mathematical Papers are $980 list, $700 institutional member, $115 individual member, $55 reviewer. Combination paper and microform (microfiche or microfilm) subscription prices are $1176 list, $840 institutional member. Microfiche of each issue will be mailed the fastest way before the camera copy is sent to the printer.

Back number information: Back number prices *per volume*: for Volumes 1–30, $180 list, $135 member; for Volumes 31–40, $280 list, $210 member; for Volumes 41–50, $420 list, $315 member; for Volumes 51–52, $564 list, $423 member; for Volumes 53–54, $640 list, $480 member. Back volumes are also available on 16 mm positive or negative microfilm. The microfilm may be mounted on spools, or in Kodak or 3M cartridges. Only current subscribers are eligible to purchase back volumes on microfilm. Write to the American Mathematical Society for a detailed price list.

Mathematical Reviews is published monthly January through November, and two times in December, in two annual volumes, with two issues (one of them an index issue for the first volume) mailed together in June. Beginning in 1978, there will be no separate index for the second volume. Instead, the Index of Mathematical Papers, included in the subscription price, will be mailed shortly after the appearance of the December issue. Cumulative author indexes exist for Volumes 1 through 20, Volumes 21 through 28, and Volumes through 29 44. Beginning with Volume 45, annual indexes are published under the title Index of Mathematical Papers.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 1571, Annex Station, Providence, R.I. 02901. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, R.I. 02940.

Journal references in Mathematical Reviews are given in the following form: *Rückschritte der Math.* (6) **5** (**56**) (1960/61), *no.* 2, 18–53 (1962), where, after the abbreviated title, one has: (series number) volume number (volume number in first series, if given) (nominal date), issue number if necessary, first page—last page (imprint date). If only one date is given, this will usually be interpreted as the nominal date and will be printed immediately after the volume number. If no volume number is given, the year will be used in its place. The symbol ★ precedes the title of a book or other non-periodical that is being reviewed as a whole. If an issue of a journal needs to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose then the latter will appear in braces { }.

References to reviews in Mathematical Reviews before Volume 20 (1959) are by volume and page number, e.g., MR **15**, 122; from Volume 20 on, by volume and review number, e.g., MR **20** #4387 or MR **23** #A123. References to reviews in Jahrbuch über die Fortschritte der Mathematik and Zentralblatt für Mathematik are by volume and page number for the period before 1972 (e.g., Jbuch **50**, 173; Zbl **29**, 323) and by volume and review number since 1972 (e.g., Zbl **226** #46013). Reviews reprinted from Applied Mechanics Reviews, Computing Reviews, Electrical & Electronics Abstracts, Mathematics of Computation, Operations Research, Physics Abstracts, Referativnyĭ Žurnal Matematika (Mehanika, etc.), Statistical Theory and Method Abstracts, or Zentralblatt für Mathematik are identified in parentheses following the reviewer's name by AMR, CR, EEA, MC, OR, PA, RŽMat (RŽMeh, etc.), STMA, Zbl, respectively.

Part 1: Author/Key Index

Index of Mathematical Papers Volume 10
Published by the American Mathematical Society
Providence, Rhode Island USA
ISSN 0025-5699

PREFACE

This annual index of Mathematical Reviews is the first to be included with each subscription. It is also available separately as Vol. 10 of the Index of Mathematical Publication (IMP). Vols. 5-9 of IMP are the annual indexes for the years 1973-1977. There are cumulative author indexes to MR that cover 1940-1959, 1960-1964 and 1965-1972.

The classification scheme used in the present subject index is the AMS (MOS) 1970 subject classification scheme except for that used in Sections 69 through 86 (which is described on pages 2194-2195 of Volume 54 of MR), and Sections 96 through 98 which do not occur at all. The 1980 Mathematics Subject Classification will be used in Mathematical Reviews starting Jan. 1980. An advance copy of this list is included on pages S1-S34 of part 2 of this index.

The entries in the author and key indexes give full bibliographic information about all items that are reviewed in MR. Those entries are accompanied by MR numbers and classification numbers; secondary classification numbers are given in parentheses. In the subject index, an item listed under its secondary classification has the MR number given in parentheses.

A star (★) preceding a title (or a name in a cross-reference) indicates a book or other non-periodical, reviewed as a whole. If an issue of a journal needs to be reviewed as a whole (e.g., when it is a collection of articles dedicated to an individual) and an ad hoc title is devised for this purpose, then the latter will appear in braces { }.

1. ALPHABETICAL ORDER

Reviewed items are listed alphabetically by author; items having several authors are listed in full under each author (this was not done in the earlier cumulative indexes). Surnames consisting of more than one part (e.g., de Branges, van der Corput) are listed under the first capital letter. Collections, proceedings and other similar publications that may have editors but do not have specific authors are given alphabetically by title in a separate list (corresponding to the key index in the monthly issues of Mathematical Reviews) following the list of authors. Individual articles in a collection are listed independently, under the names of the authors, if they were reviewed separately.

2. CROSS-REFERENCES

There are four kinds of cross-references in this index.

(a) *Name variations.*

The use of primary names in Mathematical Reviews was described in the Foreword to the 5-year index to Volumes 21-28, 1960-1964, mentioned above. All items by a given author are listed under that author's primary name and cross-references to the primary form are given from any other forms of the author's name that have been used in items reviewed.

(b) *Authors in other capacities.*

In the author index, the names of persons associated with an item in a capacity other than that of author (e.g., editor, translator, subject of a biography, etc.) are also listed. In the subject index, such names are given in parentheses in the positions that they would occupy had they been authors. In both indexes these items occur only as cross-references to complete listings.

(c) *Key entries.*

Certain collections that are listed under their titles, as described in Section 1 above, are also listed under other headings. For example, the publication entitled *Proceedings of the Symposium on Theory and Applications of Generalized Inverses of Matrices* is listed under the full title and also under the headings 'Generalized inverses of matrices' and 'Symposium on theory and application of generalized inverses of matrices'. These listings are not true cross-references, since a complete entry appears under each heading. However, there are such 'key entries' that are cross-references: e.g., a cross-reference will normally be listed under the heading 'Bibliography' to, say, an obituary notice that contains an extensive bibliography (the cross-reference will be given to the author of the article, not its subject, or to the title if the author is not known; the subject will receive a cross-reference of the kind described in Section 2(b) above, i.e., in the appropriate place among his or her publications.)

(d) *Errata.*

If an erratum receives a review separate from that of the original item then it will be listed in the usual way, but the listing for the original item will end with the letter E in parentheses: (E). This indicates the presence of a listing for an erratum, correction, comment, etc. among the subsequent entries (in this connection see also the remark on the occurrence of two review numbers in one entry, near the end of Section 3 below).

3. ARRANGEMENT OF ENTRY

The entries under a given heading (i.e., the primary name of an author, or a title) are listed in order of nominal publication dates; this includes the cross-references described in Section 2(b) above. For this purpose co-authored items are treated on the same basis as those written by the author alone. (This is a major difference between the arrangement in this index and that in the earlier cumulative indexes: in the latter, entries under a given heading were grouped into singly-authored items, doubly-authored items, etc., alphabetical and chronological subgroupings then being used within each group.)

The arrangement of each title entry is that of the heading of the original review in Mathematical Reviews. Titles in English, French, German and Italian are given as they appeared in the original, with no embellishments except for the mention of summaries in languages other than that of the item in question and, occasionally, of items such as discussion, comments, etc. Article titles in languages other than those mentioned are given in English translation (with the language of the original following in parentheses and accompanied by the mention of summaries in other languages). Book and monograph titles in languages other than those mentioned are given in the original language, the title being followed by the language of the original, in parentheses, and this being followed by an English translation of the title, in brackets.

The general form for title entries is as follows:

Books, Monographs: Title. (Language of original [if necessary]) [English translation of title [if necessary]] Miscellaneous information (edition, editors, translators, series, etc.). Publisher, city, date. Pagination. (Reviewer's name) Review number.

Journal article: Title of article. (Language of original [if necessary]. Summaries in languages other than the original [if necessary]) Journal abbreviation (series number) volume number (volume number in first series if given) (nominal date), issue number [if necessary], first page-last page (imprint date). (Reviewer's name) Review number.

The first part of the review number refers to the volume in which the review was published and the second part refers to its number within the volume. If there are two review numbers following an entry, the second one is usually an erratum. (Note: for the abbreviations of journal titles refer to the volume-index issues of the period in question.)

4. TRANSLITERATION

The transliteration of names and titles in Russian follows the scheme that has been used by Mathematical Reviews since 1962, and appropriate variants are used for Bulgarian, Macedonian, Serbian and Ukrainian.

The primary forms of Chinese names of authors who have published mainly in Chinese are those that result from the Wade-Giles romanization, the forms resulting from the Pinyin romanization being listed with cross-references to the corresponding primary forms. (See also Section 5 below and, for a more complete discussion of this rather involved matter, see pp. iv-vi of the Foreword to the *Author index of Mathematical Reviews,* 1960-1964 (*Volumes* 21-28), mentioned above).

5. NAMES OF CHINESE AUTHORS

The name of a Chinese author whose primary name has been determined as described in Section 4 above (i.e., who has not published mainly in Western journals) is placed in the index as though it were in Western form. For example, Hua Luo-geng will be listed as Hua, Luo Geng, as though the author's name were L. G. Hua (in Western form).

6. CONCLUSION

In an undertaking of this size some errors are inevitable, despite elaborate precautions and checks. The editors of Mathematical Reviews would be very glad to have their attention drawn to errors in this index and also in the earlier indexes.

Chamarie, Marc (*with* Hudry, Alain) Anneaux noethériens à droite entiers sur leurs centres. (English summary) *C. R. Acad. Sci. Paris Sér. A-B* **283** (1976), *no.* 15, Ai, A1011–A1012. (B. J. Müller) **55** #5673 16A08 (16A46)

Chamberlain, Gary (*with* Griliches, Zvi) Unobservables with a variance-components structure: ability, schooling, and the economic success of brothers. *Internat. Econom. Rev.* **16** (1975), *no.* 2, 422–449. (J. N. K. Rao) **56** #1645 62P20

Chamberlain, Michael W. Last exit times from the boundary of a continuous time Markov chain. *Ann. Probability* **5** (1977), *no.* 1, 152–156. (Arthur O. Pittenger) **55** #4396 60J50

Chambers, Ll. G. ★Integral equations: a short course. *International Textbook Co. Ltd., London,* 1976. 198 *pp.* (William L. Perry) **55** #10977 45–01

Chambers, R. L. (*with* Heathcote, C. R.) A linear model with errors lacking a variance. I. *Austral. J. Statist.* **17** (1975), *no.* 3, 173–185. (T. D. Dwivedi) **56** #1598 62J05

Chambré, P. L. (*with* Paveri-Fontana, S. L.) Uniform early time asymptotic solutions for parabolic partial differential equations. *Ann. Mat. Pura Appl.* (4) **112** (1977), 333–350. (Bhagat Singh) **55** #8529 35C99

Champagne, Lawrence Comment on: "Global asymptotic stability of certain nonlinear feedback systems" (Proc. IEEE **61** (1973), 1506–1507), by A. S. C. Sinha. *Proc. IEEE* **62** (1974), 1389. (Peter J. Moylan) **55** #7525b 93D10

de Champeaux, Dennis (*with* Sint, Lenie) An optimality theorem for a bi-directional heuristic search algorithm. *Comput. J.* **20** (1977), *no.* 2, 148–150. (Authors' summary) **56** #4279 68A50

(*with* Sint, Lenie) An improved bidirectional heuristic search algorithm. *J. Assoc. Comput. Mach.* **24** (1977), *no.* 2, 172–191. (Eberhard Lüdde) **56** #4228 68A10

Champion, J. P. (*with* Pierre, G.; Michelot, F.; Moret-Bailly, J.) Composantes cubiques normales des tenseurs sphériques. (English summary) *Canad. J. Phys.* **55** (1977), *no.* 6, 512–520. (Authors' summary) **55** #7153 81.22

Champsaur, Paul Note sur le noyau d'une économie avec production. *Econometrica* **42** (1974), 933–946. (Author's summary) **55** #14111 90A15

(*with* Laroque, Guy) A note on the core of economies with atoms or syndicates. *J. Econom. Theory* **13** (1976), *no.* 3, 458–471. (Alberto Chilosi) **55** #7334 90A99

(*with* Drèze, Jacques H.; Henry, Claude) Stability theorems with economic applications. *Econometrica* **45** (1977), *no.* 2, 273–294. (Authors' summary) **56** #14579 90A15 (93D05)

Chan, Albert W. (*with* Francis, Richard L.) A least total distance facility configuration problem involving lattice points. *Management Sci.* **22** (1975/76), *no.* 7, 778–787. (Authors' summary) **55** #7859 06A20 (65K05)

(*with* Francis, Richard L.) A round-trip location problem on a tree graph. *Transportation Sci.* **10** (1976), *no.* 1, 35–51. (Authors' summary) **55** #9895 90B10

Chan, Arthur H. C. (*with* Csörgő, Miklós) On the Erdős-Rényi increments and the P. Lévy modulus of continuity of a Kiefer process. *Empirical distributions and processes* (*Selected Papers, Meeting on Math. Stochastics, Oberwolfach,* 1976), *pp.* 17–32. *Lecture Notes in Math., Vol.* 566, *Springer, Berlin,* 1976. (Jon A. Wellner) **56** #1424 60F15 (60G17)

Chan, C. Y. Positive solutions for nonlinear parabolic second initial boundary value problems. *Quart. Appl. Math.* **31** (1973/74), 443–454. (J. R. Cannon) **55** #862 35K20

Maximal and minimal positive solutions for nonlinear radiation processes with nonlinear sinks. *Quart. Appl. Math.* **32** (1974/75), 475–478. (Mario Primicerio) **56** #9080 35K60

Chan, G. H. A characterization of minimal (k)-groups of degree $n \leqslant 3k$. *Linear and Multilinear Algebra* **4** (1976/77), *no.* 4, 285–305. (Gareth A. Jones) **56** #8666 20B10

Chan, J. (*with* Conolly, B. W.) Generalised birth and death queuing processes: recent results. *Advances in Appl. Probability* **9** (1977), *no.* 1, 125–140. (Bent Natvig) **55** #4421 60K25

Chan, K. Hung (*with* Hayya, Jack C.; Pfaffenberger, Roger C.) On some considerations in discrete regression. *Proceedings of the Annual Meeting of the American Statistical Association, Business and Economic Statistics Section* (*St. Louis, Mo.,* 1974), *pp.* 401–406. *Amer. Statist. Assoc., Washington, D. C.,* 1975. (Susan D. Horn) **55** #4533 62J05

Chan, Phan Huu (*with* Balcerzyk, Stanisław; Kiełpiński, R.) On three types of simplicial objects. *Fund. Math.* **91** (1976), *no.* 2, 145–160. (A. Dold) **55** #461 18G30 (55J10)

Chan, Robert K. C. A second-order, time integration scheme for calculating stratified incompressible flows. *J. Computational Phys.* **22** (1976), *no.* 1, 74–86. (Author's summary) **56** #10417 76.65

Chan, Sang Lung On the possible application of group representations to some boundary value and eigenvalue problems of certain domains without classical symmetry. III. Some examples. (German summary) *Z. Angew. Math. Phys.* **27** (1976), *no.* 6, 839–851. (J. Hersch) **56** #1740 65N20 (20C35)

Chan, W. L. Variational dualities in the linear regulator and estimation problems with and without time delay. *J. Inst. Math. Appl.* **18** (1976), *no.* 2, 237–247. (Tamer Başar) **55** #7536 93E10

Chan, Wan S. (*with* Callier, Frank M.; Desoer, Charles A.) Input-output stability theory of interconnected systems using decomposition techniques. Special issue on large-scale networks and systems. *IEEE Trans. Circuits and Systems* **23** (1976), *no.* 12, 714–729. (Peter J. Moylan) **56** #11334a 93D99

See also **Desoer, Charles A., 56** #11334b

Chan, Y.-K. A constructive renewal theorem. *Ann. Probability* **4** (1976), *no.* 4, 644–655. (Tze Leung Lai) **55** #4407 60K05 (02E99, 60E05)

(*with* Wierman, John C.) On the Berry-Esseen theorem for *U*-statistics. *Ann. Probability* **5** (1977), *no.* 1, 136–139. (P. K. Sen) **55** #6527 60F05

Chand, Mam (*with* Gupta, P. K.) On random service queueing system. *Pure Appl. Math. Sci.* **1** (1974/75), *no.* 2, 39–44. (William Henderson) **56** #13388 60K25

(*with* Agrawal, S. C.) On integer solutions to complementary programming problems. *Opsearch* **14** (1977), *no.* 2, 99–107. (Thomas L. Magnanti) **56** #10950 90C10

Chand, R. (*with* Davy, D. T.; Ames, W. F.) On the similarity solutions of wave propagation for a general class of non-linear dissipative materials. (French and German summaries) *Internat. J. Non-Linear Mech.* **11** (1976), *no.* 3, 191–205. (J. Mazumdar) **55** #9647 73.35

(*with* Haug, E. J., Jr.; Pan, K.) Multibody elastic contact analysis by quadratic programming. *J. Optimization Theory Appl.* **21** (1977), *no.* 2, 189–198. (S.-F. Sburlan) **55** #11788 73.65 (90C20)

Chanda, Kamal C. Asymptotic properties of order statistics attracted to normal law. *Calcutta Statist. Assoc. Bull.* **24** (1975), *no.* 93–96, 13–22 (1976). (W. Dziubdziela) **55** #6528 60F05 (62G30)

Some comments on the asymptotic probability laws of sample quantiles. *Calcutta Statist. Assoc. Bull.* **24** (1975), *no.* 93–96, 123–126 (1976). (W. Dziubdziela) **55** #6529 60F05 (62G30)

Some comments on sample quantiles for dependent observations. Special issue on nonparametric statistics. *Comm. Statist.–Theory Methods* **5** (1976), *no.* 14, 1385–1392. (J. K. Ghosh) **55** #9367 62E20 (62G30)

Chander, S. Correction to my paper "On self commutators" (Math. Nachr. **60** (1974), 303–313). *Math. Nachr.* **74** (1975), 337. (Editors) **55** #8878 47B47

Chandler, David Cluster diagrammatic analysis of the RISM equation. *Molecular Phys.* **31** (1976), *no.* 4, 1213–1223. (Author's summary) **56** #2040 81.45

Chandler, J. D., Jr. A generalization of a theorem of S. N. Bernstein. *Proc. Amer. Math. Soc.* **63** (1977), *no.* 1, 95–100. (B. D. Donevski) **55** #6065 41A20

Chandler, Philip Clairaut's critique of Newtonian attraction: some insights into his philosophy of science. *Ann. of Sci.* **32** (1975), *no.* 4, 369–378. (Eberhard Knobloch) **56** #5153 01A50

Chandna, O. P. (*with* Garg, M. R.) The flow of a viscous MHD fluid. *Quart. Appl. Math.* **34** (1976/77), *no.* 3, 287–299. (Giulio Mattei) **56** #7480 76.53

(*with* Toews, H.) Plane constantly-inclined MHD flow with isometric geometry. *Quart. Appl. Math.* **34** (1976/77), *no.* 4, 331–337. (Giulio Mattei) **56** #7479 76.53

Chandra, Ashok K. Efficient compilation of linear recursive programs. 14*th Annual IEEE Symposium on Switching and Automata Theory* (*Univ. Iowa, Iowa City, Iowa*, 1973), *pp.* 16–25. *IEEE Comput. Soc., Northridge, Calif.*, 1973. (Teresemarie McCloskey) **56** #7286 68A05 (68A20)

Degrees of translatability and canonical forms in program schemas. *Sixth Annual ACM Symposium on Theory of Computing* (*Seattle, Wash.*, 1974), *pp.* 1–12. *Assoc. Comput. Mach., New York*, 1974. (Karel Čulík) **55** #13854 68A05

Generalized program schemas. *Automata, languages and programming* (*Second Colloq., Univ. Saarbrücken, Saarbrücken*, 1974), *pp.* 562–576. *Lecture Notes in Comput. Sci., Vol.* 14, *Springer, Berlin*, 1974. (Karel Čulik) **55** #1778 68A05

Chandra, Jagdish (*with* Bernfeld, Stephen R.) Minimal and maximal solutions of nonlinear boundary value problems. *Pacific J. Mth.* **71** (1977), *no.* 1, 13–20. (L. Erbe) **56** #726 34B15

Chandra, M. Jeya (*with* Rosenshine, Matthew) Approximate solutions for some two-stage tandem queues. I. Individual arrivals at the second stage. *Operations Res.* **23** (1975), *no.* 6, 1155–1166. (Robert Foley) **55** #6619 60K25

Chandra, Prem On Euler summability of Fourier series. *Ranchi Univ. Math. J.* **5** (1974), 53–59. (G. Sunouchi) **55** #13144 42A24

Absolute Riesz summability. (Italian summary) *Atti Accad. Naz. Lincei Rend. Cl. Sci. Fis. Mat. Natur.* (8) **59** (1975), *no.* 1–2, 68–76 (1976). (W. Beekmann) **56** #3552 42A28

(*with* Sharma, M. M.) On the convergence of series of Legendre polynomials. *Indian J. Pure Appl. Math.* **6** (1975), *no.* 3, 264–275. (P. Anandani) **55** #10953 42A56 (40G05)

A note on an inclusion theorem. *Rev. Acad. Ci. Zaragoza* (2) **32** (1977), *no.* 1-2, 43–46. (W. Beekmann) **56** #12696 40D25 (40G99)

Summability of Fourier series by Euler means. *Rev. Acad. Ci. Zaragoza* (2) **32** (1977), *no.* 1-2, 47–52. (B. L. Gupta) **56** #12750 42A24

Chandra, Suresh (*with* Gulati, T. R.) A duality theorem for a nondifferentiable fractional programming problem. *Management Sci.* **23** (1975/76), *no.* 1, 32–37. (Authors' summary) **55** #14202 90C15

(*with* Bector, C. R.; Gulati, T. R.) Duality for fractional control problems. *Proceedings of the Fifth Manitoba Conference on Numerical Mathematics* (*Univ. Manitoba, Winnipeg, Man.*, 1975), *pp.* 231–241. *Congressus Numerantium, No. XVI, Utilitas Math. Publ., Winnipeg, Man.*, 1976. (Nobuo Sannomiya) **56** #14936 93C10

(*with* Bector, C. R.; Gulati, T. R.) A Lagrangian approach to duality for complex nonlinear fractional programming over cones. (German and Russian summaries) *Math. Operationsforsch. Statist. Ser. Optimization* **8** (1977), *no.* 1, 17–25. (R. N. Kaul) **56** #10974 90C30

Chandran, V. R. On duo-rings. *Atti Accad. Naz. Lincei Rend. Cl. Sci. Fis. Mat. Natur.* (8) **58** (1975), *no.* 6, 823–827. (G. Michler) **55** #10518 16A48

On a conjecture of Hyman Bass. *Pure Appl. Math. Sci.* **4** (1976), *no.* 1–2, 125–131. (Z. Papp) **55** #5690 16A48 (16A30)

On two analogues of Cohen's theorem. *Indian J. Pure Appl. Math.* **8** (1977), *no.* 1, 54–59. (Melvin Henriksen) **56** #12062 16A48
